MONTHLY UPDATE

Global emerging markets were broadly flat in July after reversing initial strong gains.

Brazil's central bank held the Selic benchmark interest rate unchanged at 10.50% in a unanimous decision, in line with forecasts.

China's central bank cut interest rates again in July. It lowered the rate on its medium-term lending facility (MLF) by 0.2 percentage points to 2.3%. This marked the first reduction in nearly a year.

The Communist Party of China (CPC) outlined its economic priorities for the second half of 2024 at a Politburo meeting held in July. While the government pledged to swiftly implement reforms and policy measures to boost the economy, it offered no new details on stimulus for the struggling property market.

The India Budget was presented by Finance Minister Sitharaman during the month. There was an emphasis on fiscal discipline, employment/skilling schemes, as well as a focus on the rural economy.

We exited Itausa in Brazil given the less sanguine macroeconomic backdrop in Brazil.

PERFORMANCE CONTRIBUTORS AND DETRACTORS

In July, the Alquity Future World fund suffered along with the global sell-off in Technology related names.

Stock selection was therefore negative in Korea (Hynix), Brazil (Despegar) and from ASML. Our 'quality growth' names also suffered in China and India, but this was partly offset by strong returns from the UAE (Aldar Property), the Philippines and Singapore (Karooooo).

## ESG: KEY PROGRESS INDICATORS

For all portfolio holdings, we track a set of Key Progress Indicators "KPIs" that represent a general set of transparency and ESG standards we want all firms to meet over time. The chart summarises the where we stand in relation to the KPIs for all the portfolio holdings. These KPIs support our engagement activity with our holdings.
