17.1%

**Average turnover of holdings (annualised) since the fund's inception

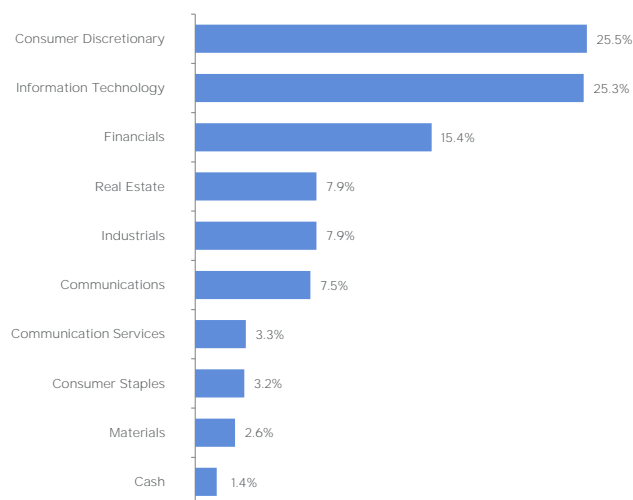

**Turnover as of 30th September 2024

*For the purposes of reporting, the unrealised capital gains have been removed from the portfolio characteristics calculations, however remain part of the Net Asset Value calculation

GEOGRAPHIC ALLOCATION

SECTOR ALLOCATION

MONTHLY UPDATE

Emerging market indices performed strongly during September, helped by the tailwind from the larger than expected initial US Fed rate cut and the announcement of further Chinese stimulus.

The Chinese measures included a 50bp cut to banks' reserve ratio requirements, reductions in mortgage rates and down payment requirements for second-time homebuyers.

Elsewhere, Indonesia cut interest rates by 25bp to 6.0% and the Philippines cut banks' reserve ratio requirements by 250bp. In contrast, Brazil increased interest rates by 25bp to 10.75%.

During the month, we exited Yongda Auto (post the Chinese stimulus announcement), and added Cebu Air (Philippines), Skipper (India) and CPALL (Thailand).

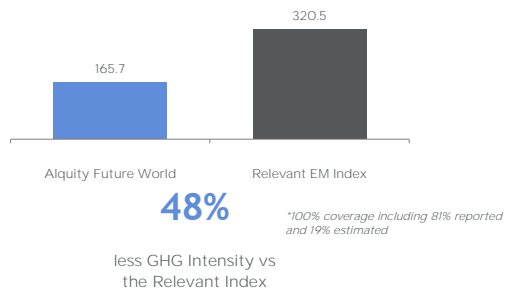

STOCK OF THE MONTH

Skipper is one of the world's leading manufacturers for transmission and distribution structures. Skipper also has EPC capabilities for transmission infrastructure projects and a burgeoning polymer pipe business. Skipper benefits from our theme of monetisable structural growth given India's ever increasing energy requirements, the global shift to renewables (requiring new grid infrastructure) and strained grid capacity globally driven by the megatrends of AI and electric vehicles. We rate Skipper as an 'C' in our bespoke ESG rating system as the company operates in a low-risk industry with ESG standards in line with regional peers. Skipper has made good progress with their environmental initiatives (with installed capacity for sewage treatment/rooftop solar/effluent treatment), but we would like to see environmental impact reduction targets put in place.

10.	Delta Electronics	1.7%
TOTAL		34.5%

CAPITALISATION

PERFORMANCE CONTRIBUTORS AND DETRACTORS

Emerging markets performed strongly in September, with the index returning 6.7% in US Dollar terms.

China was the key driver of the asset class. The Fund suffered from the underweight position, but this was significantly offset by strong stock selection (notably Tongcheng Travel).

Elsewhere, stock selection was also positive in Korea (SK Hynix and our zero weighting in Samsung Electronics), South Africa (Kumba Iron Ore, Mr Price), Indonesia (Mitra Adiperkasa), Thailand (Homepro) and Singapore (SEA) ; but negative in Brazil (Despegar) and Taiwan (Tech hardware).

WATER INTENSITY (TONNES/\$MN)

ESG: KEY PROGRESS INDICATORS

For all portfolio holdings, we track a set of Key Progress Indicators "KPIs" that represent a general set of transparency and ESG standards we want all firms to meet over time. In each case, the assessment has a financial motivation and an associated positive potential impact in line with the principles of the UN Global Compact. The chart summarises the where we stand in relation to the KPIs for all the portfolio holdings. These KPIs support our engagement activity with our holdings. Please contact us or refer to our Responsible Investment brochure for full details.

Holdings meeting each KPI standard - % of companies ¹

FUND OBJECTIVE

The Alquity Future World Fund is equity focused and targets attractive risk-adjusted returns over the long-term by investing in public companies across the emerging and frontier markets. Our portfolio emphasises long-term themes, transparency and alignment of management. This is achieved by a fundamental process which incorporates both financial valuation and Environmental, Social and Governance analysis of material non-financial factors.
