MONTHLY UPDATE

The Indian market remained under slight pressure in January, with the benchmark falling by 3.0% in net USD terms, as the fallout from the Adani fraud controversy weighed on sentiment.

Despite this, the macro data in January were encouraging, with CPI inflation declining further to 5.7% y/y and industrial production rebounding by 7.1% y/y. With inflation pressures easing, the RBI is likely to slow the pace of rate hikes to 25bp at its next meeting.

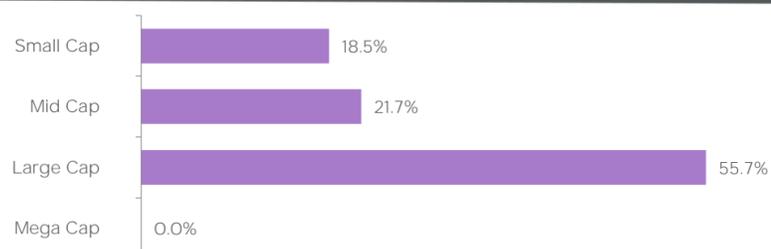

Meanwhile, the FY24 budget struck a balance between maintaining a commitment to fiscal consolidation, whilst still providing support to the economy. The fiscal deficit is expected to fall to 5.9% of GDP next fiscal year, while the capex budget will be increased by 33% and consumption supported with lower taxes.

We therefore remain constructive on the Indian outlook, as growth is likely to stay robust through FY24. During the month, we reduced TCS due to its exposure to developed markets, where growth risks are greater at this juncture.
