PERFORMANCE CONTRIBUTORS AND DETRACTORS

In April, the Alquity India Y class rose 3.14% in US Dollar terms (net) versus the 2.32% gain in the relevant Indian index, and the 1.47% increase in the Indian ETF (which reflects the impact of capital gains tax and is thus a better long term comparable to fund performance).

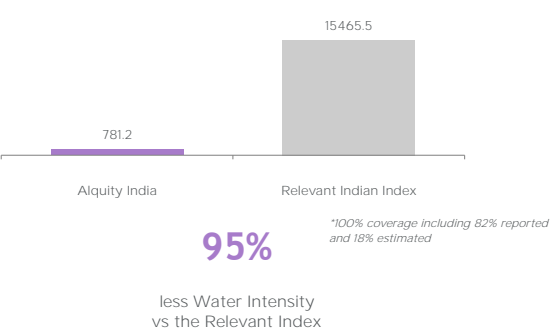

The trend of improving performance (that began in mid-March) continued and strengthened during the month. This was driven by strong returns from Lemon Tree Hotels, Prince Pipes and from the zero weighting in Reliance Industries.

At a sector level, the Fund benefited most from the overweighting to Consumer Discretionary and Industrials.
