CAPITALISATION

PERFORMANCE CONTRIBUTORS AND DETRACTORS

In February, the Alquity India Y class rose 0.4% in US Dollar terms (net) versus the 2.7% gain in the relevant Indian index, and the 2.2% increase in the Indian ETF (which reflects the impact of capital gains tax and is thus a better comparable to fund performance).

The Fund suffered from the continued strong performance of the Energy and Utility sectors, where we have a zero weighting due to our concerns regarding the quality of the companies.

Dixons (consumer electronics), Mahindra & Mahindra (autos) and Redington (IT distribution) were amongst the best performers during the month. However, stock selection was poor in the Industrials sector, with TCI Express and Prince Pipes delivering negative returns.

ESG: KEY PROGRESS INDICATORS

For all portfolio holdings, we track a set of Key Progress Indicators "KPIs" that represent a general set of transparency and ESG standards we want all firms to meet over time. In each case, the assessment has a financial motivation and an associated positive potential impact in line with the principles of the UN Global Compact. The chart summarises the where we stand in relation to the KPIs for all the portfolio holdings. These KPIs support our engagement activity with our holdings.
